

Table Column Set 1 E 100V - 240V

The Table Column Set 1 E 100V - 240V is the basis for electrically height-adjustable work benches. The powerful lifting column enables the construction of individual workstations. Height-adjustable table columns provide an ergonomic working position for users of different heights, as well as making it easy to switch between sitting and standing work. Three electrically synchronised columns can be used to create corner solutions and special fixtures.

Scope of Delivery

- 1 column, Al, anodized, natural, with 2 m cable
 - 1 Control unit with 5 m mains cable,
 - 1 Table switch panel, 3 positions storable, digital height gauge with 2 m cable
- Notes on Use and Installation
