

Screw Anchor ST 8x130, bright zinc-plated

The item Screw Anchor can be used to fix machinery, stairways, guards and racks securely to the floor or a wall. It can be installed quickly, with no need for dowels or other filler materials. The Screw Anchor has "Option 1" ETA approval for cracked and uncracked concrete. The specially shaped tip and cutting edges at the side ensure this concrete bolt exhibits optimum setting characteristics. It can also be unscrewed and reused.
