

Guide Wedge 8 40x40 30°, Double-Sided

Guide Wedge 8 40x40 30°, Double-Sided gently guides moving elements to keep them heading in the right direction. The wedge-shaped geometry can help guide individual elements to either side of a profile in order to split goods flows, for example.

The guide element is fastened to the core bore of a Line 8 profile, at the end face, or can alternatively be secured to the groove.
