

Castor Ball Set 8 D24 ESD is installed in a Line 8 groove and can be used to create conveyor sections in custom lengths, widths and shapes directly on Line 8 profiles. These conveyor sections are ideal for forwarding small load carriers, workpiece carriers and inherently stable panels, or creating input or output points for conveyor lines. Brush Set 8 D24 ESD (0.0.726.09) can be used to bring transported goods gently to a stop at the end of the line.
