

Automatic Flat Bracket Set 8 120x40 Al

Automatic Flat Bracket Set 8 120x40 Al provides added rigidity for a profile connection in a frame and connects up to three Line 8 profiles. Thanks to the prefitted automatic T-slot screws, the bracket can be tightened immediately, without any need to position T-Slot Nuts. The aluminium plate is fitted to the Line 8 grooves of the profiles from the outside. Its large support width results in effective torque load compensation.

Note: Automatic Flat Bracket Sets are not intended as a substitute for screw-attached fastening sets.
