

Monitor Arm HD, height-adjustable, 5 joints

Monitor Arm HD, height-adjustable, 5 joints is an ergonomic, reliable and space-saving solution for adjusting a large screen in any direction, including viewing distance, even when using an integrated PC or an additional keyboard shelf or thin client holder. This robust, well-balanced double pivot arm features a gas spring and can carry a monitor with a total weight of 8 to 20 kg.

The monitor arm can be fastened to either a horizontal or a vertical Line 8 groove. Cables fed through to the display are securely covered.

Scope of Delivery

- 1 monitor arm, 5 joints, die-cast Al
- 1 cable guide
- 1 Vesa adapter 75 and 100
- 1 profile adapter
- Fastening elements

Technical note

The weight of the monitor is balanced by an adjustable gas pressure spring.
